

Workshops

Mass Media and Communications- "The media is not a reflection of reality, but the reality is reflected on the world." - Khushboo Talati

Hands on learning with one of the best media professors is not always an opportunity that is given, but when it is you grab it and learn as much as you can. We were lucky enough to have learned how green screens are used, different types of camera angles, life of a film maker and etc.

Forensic Science - "We speak for the dead to protect the living." - Julie Maggie

Blood, gore, murder, law, crime, Forensics is one of the most interesting courses that has ever been done. We got a total all rounded idea of what it is and got to see the various tools used by the government to catch foul-play in passports, ID's, etc.

Fashion Design - "Everyday is a fashion show and the world is the runway." - Coco Chanel

An amazing workshop was conducted by the faculty of fashion design who gave us an insight of all things fashion, and even helped us create our own outfits within hour and were later presented. It was a beautiful experience filled with fun and color.
